## Treasury Market Financing: Refunding of February 1 Certificates and Commodity Credit Corporation Notes

### Refunding

On January 22, 1945, the Treasury announced an exchange offering for the issue of 7/8% certificates of indebtedness maturing February 1, 1945, and for the 1-1/8% Commodity Credit Corporation notes maturing February 15, 1945. Holders of these two issues were offered new 7/8%, one-year certificates of indebtedness to be dated February 1, 1945, and to mature February 1, 1946. Subscription books for these exchanges opened January 22 and closed January 24, except for holders of \$100,000 or less of the maturing securities, for whom the books closed on January 27.

The maturing certificate issue, outstanding in the amount of \$5,048 millions, was one of the securities issued in the Fourth War Loan. The Commodity Credit Corporation series G notes, outstanding in the amount of \$412 millions, were issued in the summer of 1941. This was the last

issue of guaranteed securities offered to the general public, as the Treasury, in October 1941, adopted a policy of financing Government corporations from the proceeds of the issuance of public debt obligations, and of itself holding the obligations of the corporations.

Exchanges of the maturing securities were made par for par, with an adjustment of interest as of February 1 in the case of the Commodity Credit Corporation notes.

### Treasury Bills

Weekly offerings of Treasury bills during January 1945 included one issue of \$1,200 millions and three issues of \$1,300 millions. At this rate, new issues of bills just balanced weekly maturities. No new money was raised by the issuance of Treasury bills during the month of January.

1/ In the fiscal years 1935 and 1936, \$91 millions and \$554 millions, respectively, were transferred from increment on gold to the working balance for retirement of national bank notes. In this statement, however, charges for retirement of national bank notes are

reflected directly against increment on gold in the years during which the retirements were actually made. Inactive gold in the amount of \$1,087 millions for the fiscal year 1937 is considered as a part of the working balance.

<sup>1/</sup> Excludes postal savings bonds, Federal Housing Administration debentures, and guaranteed securities held by the Treasury.<sup>2/</sup> It should be noted that callable issues appear twice in this column, once in the year of first call and again in the year of final maturity. Callable issues with respect to which a definite notice of call has been made, however, are listed as fixed maturities. The abbreviations refer to the following corporations: Home Owners' Loan Corporation and Commodity Credit Corporation.<sup>3/</sup> Federal securities fall into three broad groups with respect to imposition of Federal income taxes on income derived therefrom. Wholly tax-exempt securities are exempt from both the normal and surtax rates. Partially tax-exempt securities are exempt from the normal rates except that in the case of partially tax-exempt Treasury and savings bonds, interest derived from \$5,000 of principal amount owned by any one holder is also exempt from the surtax rates. Taxable securities are subject to both normal and surtax rates.

• Less than \$50,000.

1/ At current redemption values except Series G, which is stated at par.

2/ Estimated, except for Series G.

3/ For details concerning investment yields and redemption values, see "Treasury Bulletin" for August 1943, page 4.

4/ Commercial bank purchases were permitted prior to April 1, 1940, and are estimated to have aggregated about \$300 millions.

5/ Not yet available.

6/ Series A-D, sold between March 1935 and April 1941, are 10 year discount bonds sold at 75% of maturity value, yielding 2.90% per annum if held to maturity; purchases were limited to \$7,500 issue price in any calendar year and from April 1, 1940, could be made only by individuals.

7/ Redemptions of Series A-E bonds by eligible banks and trust companies, which commenced in October 1944 (see "Treasury Bulletin" for October 1944, page A-1), have not been wholly classified by series. For purposes of this table it has been necessary to assume that all such redemptions were Series E bonds even though small amounts of Series A-D may have been included. Consequently the amount outstanding of Series E may be slightly understated and Series A-D slightly overstated.

8/ Series E, on sale since May 1, 1941, is a 10 year discount bond sold at 75% of maturity value, yielding 2.90% per annum if held to maturity; purchases are limited to \$3,750 issue price in any calendar year and may be made only by individuals.

9/ Series F and G have been on sale since May 1, 1941. Series F is a 12 year discount bond sold at 74% of maturity value, yielding 2.53% per annum if held to maturity. Series G is a 12 year current income bond, sold at par, bearing interest at the rate of 2-1/2% per annum, redeemable at par on maturity or at stated prices less than par before maturity. Purchases of Series F and G combined in any one calendar year are limited to \$100,000 issue price (\$50,000 in calendar year 1941) and through December 31, 1943 could be made by any investor except commercial banks. Commencing January 1, 1944, commercial banks were permitted to purchase Series F and G bonds under certain conditions. For such limitations for the period January 1, 1944 through November 19, 1944, see "Treasury Bulletin" for December 1944, page 36, footnote 9. Commencing November 20, 1944, the limit on commercial bank purchases was \$100,000 providing that total holdings of Series F and G bonds, 2% Treasury bonds of 1952-54, and 2-1/2% Treasury bonds of 1966-71 did not exceed 10% of the combined amount of time certificates of deposit of individuals and non-profit corporations or associations and of savings deposits, or \$500,000, whichever was less.

## Sales and Redemptions of United States Savings Bonds - (Continued)

Table 4.- Redemptions of Series A-D and E Combined, Classified by States

Data on savings bond redemptions by States for Series A-D and E combined became available beginning in October 1944. Figures for the months of October, November, and December 1944 are shown below. It should be noted that State figures on redemptions are not necessarily comparable

with sales data by States inasmuch as bonds which have been purchased in one State may have been redeemed in another. Moreover, the figures on redemptions are on the basis of current redemption value, whereas the sales figures are at issue price.

(In thousands of dollars at current redemption values)

\* Less than \$50,000.

<sup>1/</sup> These notes were originally designed to help taxpayers set aside funds with which to pay taxes and were known as Treasury tax savings notes. Series A notes were designed for the small and moderate taxpayer; Series B and Series C notes were intended for the large taxpayer. When the collection of taxes through withholding at the source commenced, the need for Series A tax savings notes disappeared and their sale was discontinued. Redemption provisions on Series A notes were relaxed to provide for the payment of interest on notes thereafter redeemed for cash (see footnote 3). Sale of Series C notes, which were designed for the investment of idle cash reserves as well as for the accumulation of tax reserves, was continued and the notes were designated Treasury savings notes.

<sup>2/</sup> Includes matured Treasury savings notes.

<sup>3/</sup> Series A notes, which were sold from August 1, 1941 through June 22, 1943, yield approximately 1.92% per annum. Through June 22, 1943, the notes could be redeemed for cash only at the original purchase price; since that date, the notes have been redeemed for cash at

the tax payment value current at the time of presentation. (See also footnote 1.) Prior to October 4, 1943, the maximum amount which could be used in payment of each class of tax (income, estate, or gift) by each taxpayer during each taxable year was limited to \$5,000 per value; this limitation was removed as of that date.

<sup>4/</sup> Series B notes were sold from August 1, 1941 through September 12, 1942, to yield approximately 0.48% per annum. The amount which may be turned in on taxes is unlimited. The notes may be redeemed for cash only at the original purchase price.

<sup>5/</sup> Series C notes went on sale September 14, 1942. Interest accrues each month on a graduated scale (see "Treasury Bulletin" for August 1943, page 4) to yield approximately 1.07% per annum if held to maturity. These notes may be used in payment of Federal taxes at any time two months after the date of issue. The amount which may be turned in on taxes is unlimited. The notes may be redeemed for cash six months after the date of issue at the tax payment value current at the time of presentation. Prior to July 27, 1943, notice of 30 days was required for cash redemption. See also footnote 1.

Source: Daily Treasury Statements commencing November 1, 1942; prior thereto, Post Office Department.

1/ Figures for periods prior to November 1, 1942 are not strictly comparable with subsequent data because of the shift to a Daily Treasury Statement basis. Stamps sold prior to October 1, 1942 were known as postal savings stamps and were obligations of the Postal Savings System but subsequently became public debt obligations.

2/ Estimated on the basis of samples conducted by the Post Office Department.

3/ Sales and redemptions commence with May 1, 1941 when the special defense series of stamps went on sale. The amount of the old series of postal savings stamps outstanding on April 30, 1941 was \$150 thousands.

4/ Details not available for May, June, and July 1941.

5/ Includes minor amounts which were exchanged for postal savings certificates. These aggregated \$123 thousands for the period August 1, 1941 through June 30, 1942 and \$55 thousands for the period July 1, 1942 through October 31, 1942.

6/ Net of sales less redemption. See footnote 1.

7/ Does not include amounts transferred from Postal Savings System to the Treasury to cover outstanding stamps.

- 1/ When the price of a security is such as to result in a negative yield, the excess of price over zero yield is given in the yield columns in thirty-seconds.
- 2/ Prices represent the mean of closing bid and ask quotations in the over-the-counter market except that prices of Treasury and Home Owners' Loan Corporation bonds for the period prior to October 1, 1939, represent closing prices on the New York Stock Exchange. "When issued" prices are included beginning October 1, 1939. Dates of highs and lows, in case of recurrence, are the latest dates.

- 3/ Computed on mean price to call date when mean price is above par and to maturity date when mean price is below par.
- 4/ Included in the average of long-term taxable Treasury bonds.
- 5/ Quoted on yield basis.
- 6/ Excludes Federal Housing Administration debentures.
- 7/ This is the only bond eligible to remain in the average of long-term partially tax-exempt Treasury bonds.

Basic of Computation: (1) Treasury bond yields are computed on the basis of the mean of closing bid and ask quotations in the over-the-counter market, beginning September 2, 1941; previously, closing prices on the New York Stock Exchange were used on days when sales took place on the Exchange in a particular issue and the mean of closing bid and ask quotations on the New York Stock Exchange on days when no sales took place. (2) Corporate bond yields are computed on the basis of closing prices on the New York Stock Exchange and the New York Curb Exchange; on days when an issue does not sell, the price of the last preceding sale is used.

Back Figures: Monthly and weekly data for the period January 1933 through March 1944 appeared in the "Treasury Bulletin" for April 1944, pages 57-61.

Taxable bonds are those the interest on which is subject to both the normal and surtax rates of the Federal income tax. For discussion of present composition of high-grade corporate bond average, see "Treasury Bulletin" for January 1945, page 56; for discussion of its previous composition, as well as the considerations underlying its construction, see "Treasury Bulletin" for April 1943, page 61.

2/ Monthly averages of daily figures. Prior to April 1, 1938, corporate bonds are averages of Saturday figures.  
3/ The composition of the high-grade corporate bond average was revised commencing with November 1, 1944. See footnote 2.  
4/ Indicates change in composition of average.

CORPORATIONS AND CREDIT AGENCIES  
OF THE UNITED STATES GOVERNMENT

---

The new quarterly statements of United States Government corporations and credit agencies provide information regarding their (1) assets and liabilities, (2) income and expense, and (3) sources and application of funds.

Two of these statements have already been published in the "Treasury Bulletin": Assets and liabilities as of September 30, 1944 appeared in the "Treasury Bulletin" for December 1944, pages 59-63; sources and application of funds for the quarter ended September 30, 1944 appeared in the "Treasury Bulletin" for January 1945, pages 60-64. The third statement, covering income and expense, will appear in a forthcoming issue.

It is planned to publish these three statements quarterly. The March 1945 issue of the "Treasury Bulletin" will carry the statement of assets and liabilities as of December 31, 1944; the April 1945 issue will carry the statement of sources and application of funds for the six months ended December 31, 1944, and the income and expense statement will be published in a subsequent issue.
